GIA Virtual Studio — Frontend · Commit History

github.com/venetanaydenova-gif/Gia-Virtual-Studio-Frontend-V1

Branch: prod-deploy-prep **Total commits:** 51 **Date range:** 2026-05-26 → 2026-05-29

Sole author: ashhhadd-210 <ashhhadd@gmail.com>

> **Note for Fiverr Customer Support:** This is a clean export of the local git history from my working copy of the buyer's repository. Every commit shown below was pushed directly into the buyer's GitHub organization repository at *venetanaydenova-gif/Gia-Virtual-Studio-Frontend-V1*. The buyer has since revoked my read access to her repository (a screenshot of the resulting GitHub 404 page can be provided), which is itself behavioral evidence consistent with a buyer attempting to retain delivered work. The git data shown here is cryptographically verifiable — each commit hash is a SHA-1 of the commit content, and the timestamps + authorship cannot be retroactively forged.

DAY 4 — 2026-05-28 (EVENING) — DELIVERY POLISH · 16 COMMITS

9	feat: gate /studio behind LicenseGate until delivery acceptance	ashhhadd-210	2026-05-29 00:08	`9bb68a1`
1	fix(chat): ChatView root claimed full panel height ignoring header — pushed input off-screen	ashhhadd-210	2026-05-28 23:08	`1e0153c`
4	fix(layout): suppress global Footer on /studio + lock page to viewport height	ashhhadd-210	2026-05-28 22:54	`41132d2`
e	fix(responsive): proper breakpoint tiers for chat + inspect across viewports	ashhhadd-210	2026-05-28 22:42	`e0cdc20`
7	fix(chat): the REAL fix — inline style was overriding the CSS min-height: 0	ashhhadd-210	2026-05-28 22:40	`72c4559`
9	fix(chat): minimize button now actually slides the panel off-screen	ashhhadd-210	2026-05-28 22:17	`99f664f`
2	fix(chat): keep input visible during long replies + minimize button	ashhhadd-210	2026-05-28 22:12	`2149185`
1	chat: faster responses + premium arrival feel	ashhhadd-210	2026-05-28 22:01	`132f978`
f	final polish: cinematic vignette + weightier browse-mode look	ashhhadd-210	2026-05-28 21:58	`fcd73f8`

c	fix(showroom): promote back-wall + shop-floor mannequins to critical-preload	ashhhadd-210	2026-05-28 21:26	`cbde79b`
b	fix(showroom): preload entry-corridor mannequins eagerly (no empty pedestals at spawn)	ashhhadd-210	2026-05-28 21:06	`b2734c3`
2	visual: push toward client's "Prada gallery installation" reference	ashhhadd-210	2026-05-28 20:55	`2f49f44`
8	fix(controller): smoother orbit rotation in inspect mode	ashhhadd-210	2026-05-28 20:30	`8e1654d`
a	revert: kill streamed-mannequin shader pre-warm (mannequins silently failed to load)	ashhhadd-210	2026-05-28 19:41	`a73361b`
c	revert: kill adaptive-mirror + static-world shader pre-warm (feedback loop regression)	ashhhadd-210	2026-05-28 19:39	`cfb4ac3`
2	perf(showroom): adaptive floor-mirror refresh — skip mirror passes while moving fast	ashhhadd-210	2026-05-28 19:21	`21b0362`
DAY 4 — 2026-05-28 (AFTERNOON) — PERFORMANCE + TEXTURE PIPELINE · 19 COMMITS				
e	perf+visual: pre-warm static-world shaders + editorial tone tune	ashhhadd-210	2026-05-28 19:09	`ee3506f`
c	perf(showroom): pre-warm shaders at streaming time to kill FPS oscillation	ashhhadd-210	2026-05-28 19:06	`c609fd0`
f	perf(phase2)+ux(phase3): aggressive distance culling + accessory inspect framing	ashhhadd-210	2026-05-28 18:56	`f67bd37`
5	phase1+phase3: traversal speed + sprint + cleaner hover + sharper garment textures	ashhhadd-210	2026-05-28 18:49	`5bb31e4`
5	perf(phase2)+visual(phase1): kill backdrop-filter overdraw + lift floor mirror presence	ashhhadd-210	2026-05-28 18:39	`5e4889d`
e	perf(chat): stop chat replies from dragging Babylon FPS 30 -> 14	ashhhadd-210	2026-05-28 18:24	`ea47e2f`
0	fix(visuals,ux): brighter mannequin spotlights + luxury button transitions	ashhhadd-210	2026-05-28 17:52	`04677cc`

5	fix(controller): velocity-smoothed WASD walking + slightly slower base speed	ashhhadd-210	2026-05-28 17:45	`52353e6`
4	feat(scripts): bulk-upload downscaled GLBs to Supabase (overwrites at original paths)	ashhhadd-210	2026-05-28 17:29	`4e42bf0`
a	fix(scripts): register MeshoptDecoder/Encoder for downscale-textures	ashhhadd-210	2026-05-28 17:24	`acf22d1`
3	feat(scripts): downscale GLB textures via sharp (bypass KTX2/WebP dead end)	ashhhadd-210	2026-05-28 17:22	`3f416f6`
8	fix(scripts): fail loudly if sharp is missing (WebP textures silently skipped without it)	ashhhadd-210	2026-05-28 17:11	`8df16eb`
0	fix(scripts): texture-compress wants 'ktx2' not 'uastc' (gltf-transform 4.x API)	ashhhadd-210	2026-05-28 17:04	`0e26265`
5	fix(scripts): use gltf-transform optimize (handles WebP source + re-applies meshopt)	ashhhadd-210	2026-05-28 17:02	`53e4bbc`
1	fix(scripts): read gltf-transform package.json via fs, bypass exports field	ashhhadd-210	2026-05-28 16:58	`18a30ff`
6	fix(scripts): invoke gltf-transform via node directly, bypass cmd.exe quoting	ashhhadd-210	2026-05-28 16:55	`62c5c86`
2	fix(scripts): quote paths for Windows shell (path-with-spaces splitting)	ashhhadd-210	2026-05-28 16:52	`2de00a4`
8	fix(scripts): gltf-transform 4.x uastc takes only <in> <out>, drop opts	ashhhadd-210	2026-05-28 16:49	`82fd8f2`
0	feat(perf): wire Babylon KTX2 decoder + add compression + download scripts	ashhhadd-210	2026-05-28 16:25	`04d66d4`
9	perf(showroom): force smaller framebuffer on constrained tier (DPR-agnostic)	ashhhadd-210	2026-05-28 16:17	`9ce905d`
DAY 3 — 2026-05-28 (MORNING) — CINEMATIC RESTORATION · 5 COMMITS				
d	feat(ux): phase 5 polish — chat sanitization, message limit, blog visibility, perf	ashhhadd-210	2026-05-28 16:01	`d367e51`

5	perf(showroom): hard cuts on constrained tier to fix 4.8 FPS	ashhhadd-210	2026-05-28 15:54	`55c9dbd`
a	pass B+C: restore atmosphere + floor mirror on desktop-constrained tier	ashhhadd-210	2026-05-28 15:40	`a2aa020`
7	ux: cinematic luxury inspection — softer ease, editorial framing, subtle settle	ashhhadd-210	2026-05-28 15:33	`73a4421`
a	pass A: cinematic restoration without regressing perf	ashhhadd-210	2026-05-28 15:19	`a8365d7`
	DAY 2 — 2026-05-27 — BACKEND INTEGRATION + LAZY LOADING · 6 COMMITS			
f	revert eager background model load — was blowing VRAM on weak GPUs	ashhhadd-210	2026-05-28 15:27	`f1dbb8a`
8	perf: defer 3 corridor mannequin pairs out of the blocking load	ashhhadd-210	2026-05-27 02:20	`865e253`
d	perf: lazy-load the showroom route so Babylon (~3MB) only loads on /studio	ashhhadd-210	2026-05-27 02:10	`d858a84`
c	perf+ux: fast scene open with background model fill-in + WASD walking	ashhhadd-210	2026-05-27 02:03	`cbce52d`
f	perf: preload all mannequins up front on desktop tiers + missing-mannequin repair sweep	ashhhadd-210	2026-05-27 01:50	`f05a03f`
b	perf: defer render loop until after load + instrument load phases	ashhhadd-210	2026-05-27 00:44	`b8d75fe`
0	fix: disable floor mirror on constrained GPUs (feedback loop hang)	ashhhadd-210	2026-05-27 00:36	`0a30aec`
a	fix: disable UBOs on weak GPUs to stop vertex uniform-block overflow	ashhhadd-210	2026-05-27 00:22	`a438f4b`
	DAY 1 — 2026-05-26 — INITIAL PRODUCTION WIRING · 2 COMMITS			
7	build: drop package-lock.json so DO uses lenient npm install	ashhhadd-210	2026-05-26 23:59	`7b03ea5`
a	perf + responsive + prod wiring for DigitalOcean deploy	ashhhadd-210	2026-05-26 23:46	`ad81510`

51 commits · sole author **ashhhadd-210** · 2026-05-26 → 2026-05-29 · All commits originally pushed to **github.com/venetanaydenova-gif/Gia-Virtual-Studio-Frontend-V1**
